8.2HD

DOCKER

Intro

Dockerization is an HD task, in order to claim an HD, you must provide a working docker version of your application.

Instructions

Attend the workshop session and learn how to use Docker to “Distribute” your application.

or also use the video below:

<https://youtu.be/0EJu1ienLdM>

HD Claim

In order to claim this Task, you must provide the link of your application with your final delivery (week 12) . The tutor will execute the container. Make sure to provide details in your docker page on how to run the container , eg , provide the link of code to make it work.

Submission details and Delivery

- Once you are done, push your code into your repo, giving the repository the following name.
sit725-2024-t2-prac8,
- Share your repo link and provide screenshots of the running code as evidence, convert it to .pdf and upload it to the OnTrack.

If you want to be sure, simply clone your repo. If you can clone it, I can clone it 😊
